

# SINERGA EMULSIFIERS

*Your beauty, our touch*

Sinerga owns a **full range of 6 emulsifiers**, each one with its own sensorial profile, its own personality.

Together, they meet the multiple needs of the cosmetic market.

It is not always easy to understand which emulsifier suits most the texture you'd like to achieve, therefore we've summed up the main characteristics.

**NANOCREAM**

**SENSOCREAM**

**PROLIX RB**

**SUPREME**

**PHYTOCREAM 2000**

**EWOCREAM**

# SINERGA EMULSIFIERS: textures

## NANOCREAM & SENSOCREAM:

High spreadability and lightness, without leaving white effect nor greasiness.

They give a silky silicon-like skin feeling (both during and after application).

Dry touch replacing the presence of alcohol in the formula.

## PROLIX RB:

Extremely versatile, it allows to achieve a great variety of viscosities by changing its percentage.

It leaves the skin hydrated with an excellent soft end-feel.

## SUPREME:

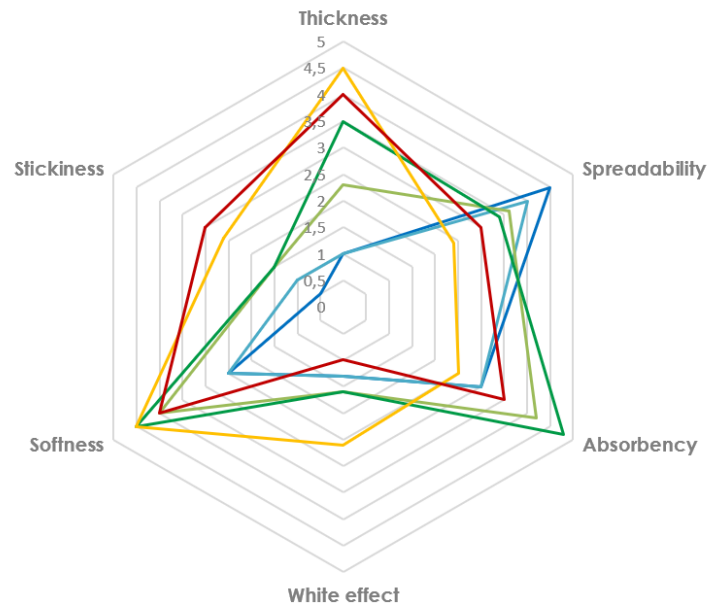

Extremely versatility and compatibility. It create superior textures with a velvety feeling even with increased consistency.

It leaves skin very soft at touch with a long-lasting effect.

## PHYTOCREAM 2000:

Its creates very rich and full-bodied emulsions, also eudermic due to its liquid crystals network melting on skin.

It confers high pleasantness during spreadability, therefore it is suitable also for extended areas. It leaves skin nourished.

## EWOCREAM:

Different textures - from creams to pastes and butters – with good absorbency and easily absorbed.

It gives form to very consistent emulsions but without white effect or heaviness on skin.

# SINERGA EMULSIFIERS: applications

## SENSOCREAM

Sprays  
Hyperfluid emulsions  
Wet wipes  
From serums to emulgels
